the machine's features

CORRUGATOR

~ Double facer retrofit

AL-GAR is able to partially or totally retrofit the double facer. We are able to adapt both the electronic and the mechanical parts.

The functionalities we include are as follows:

- Shoe weight system.
- Rollers weight system.
- Manufacturing and replacement of table plates.
- Improvement of the belt's guiding.
- Preheater including wrapping rolls placed at the entrance of the double facer.
- Automatic control system based on speed and/or temperature.
- Manufacturing of reduction boxes.
- Dimensioning and change of the motor to increase the table's traction and speed.
- Replacement of motors and inverter from DC to AC.
- Change of hand.
