CORRUGATOR

~ Glue unit retrofit

We retrofit the mechanical, electric and electronic parts of the glue units.

We manufacture the following systems for the application of glue:

- Shoe system.
- Contact roller system.

Some of the retrofit's options are as follows:

- Anilox roller cleaning system.
- Automatic limiters controlled via LED light barriers.
- PLC replacement.
- Replacement of motors and inverter from DC to AC.
- Change of electronics for market components.
- Change of hand of the entire equipment.
